- Clarified diagnostic findings to hundreds of customers and outlined service options
- Attained a 98% customer satisfaction rating through effective communication & repairs
- Gained knowledge of standard equipment, including manufacturer repair guidelines

EDUCATION

Network Systems Technology

Eastern Florida State College • Melbourne, FL
Engaged in foundational studies related to network systems.

Cyber Security Analyst training

MyITFuture • Orlando, FL

SKILLS

Managing cybersecurity risks

Installing network components and Implementing security measures

Responding to incidents promptly and effectively

Administering endpoint security solutions

Utilizing Security Information and Event Management (SIEM)

Log review & analysis for advanced troubleshooting

Applying cryptographic techniques to safeguard data

Utilizing virtualization technologies (VMware)

Leveraging threat intelligence for preemptive defense strategies

• Implementing automation through software or scripts (Powershell / Python)

• Conducting thorough network assessments and system tests (Greenbone / Tenable Nessus)

• Collaborating with AI (Artificial Intelligence) Agents & Agentic systems.

• Experience with RMM, EDR & MDR platforms (Datto RMM, Datto EDR, RocketCyber MDR)

• Ensuring compliance with industry standards: NIST, ISO 27001, HIPAA, PCI DSS & FIPS.
